

The Teal-Jones Group

Western Hem-Fir TEAL Brand Decking

Treated Hem-Fir products are visually appealing, strong and, in comparison to the naturally durable western cedars and redwoods, among the more economical species considerations for decks and other outdoor amenities. Within the western species groups, Hem-Fir is a preferred species group for preservative pressure treating.

5/4 x 6 Radius Edge graded to WWPA standards and Pressure Treated with a clear or cedar tinted solution
